Information and Mandatory Statements

Ref.	Field	Content
I.01	**Nature of this document**	This document is a white paper prepared for presentation and disclosure purposes in relation to the SKHY2Lw Token. The Token is intended to be a digitally native note issued by the Issuer and referencing the HKEX-listed product with stock code 7709. This document is not a regulatory filing and has not been submitted to or approved by any competent authority.
I.02	**Compliance statement**	The Issuer is solely responsible for the content of this white paper. This white paper has not been reviewed or approved by any competent authority in any jurisdiction.
I.03	**Warning**	The Token does not provide any fixed return or capital protection and may result in substantial or total loss. It is not covered by any investor-compensation or deposit-guarantee scheme. Prospective investors should read this white paper as a whole, together with the definitive transaction documents, which prevail in the event of any inconsistency.

Summary

Ref.	Field	Content
I.05	**Warning**	This summary should be read as an introduction to the white paper. Any decision to acquire the Token should be based on the white paper as a whole and on the definitive transaction documents, not on the summary alone.
I.06	**Characteristics of the token**	The SKHY2Lw Token represents a digitally native note (each, a “Note”) issued by Cocoa Issuer Limited, a British Virgin Islands special purpose vehicle (the “Issuer”). Each Token represents one Note and provides contractual economic exposure to the CSOP SK Hynix Daily Max (2x) Leveraged Product (HKEX stock code: 7709) (“7709”) in accordance with the definitive transaction documents. The Notes constitute direct, unsecured and unsubordinated obligations of the Issuer. Holders do not own any units of 7709 and have no direct proprietary or beneficial interest in 7709, the fund of which it forms part or any assets maintained by the Issuer. For hedging, liquidity management and operational purposes, the Issuer may maintain assets comprising units of 7709, cash or cash equivalents. Those assets remain assets of the Issuer and do not constitute collateral or security for the Notes, are not held on trust for Holders and do not give Holders any proprietary, beneficial or other interest in them.
I.07	**Right of redemption**	The Notes are perpetual and have no scheduled maturity date. Creation and redemption in the primary market may be effected only through a Participating Dealer approved by the Issuer and in accordance with the definitive transaction documents. A Holder may not submit a creation or redemption request directly to the Issuer outside those procedures.

		Any Put Option available to a Holder must be exercised through an approved Participating Dealer and remains subject to the applicable notice period, KYC/AML/KYT and sanctions requirements, settlement conditions and operational procedures. The Issuer may exercise its Call Option in accordance with the definitive transaction documents. Creation or redemption may be suspended or delayed where reliable valuation, acquisition or disposal of 7709 units, settlement or reconciliation is unavailable.
I.08	**Key information about the offer and admission to trading**	The working launch target is the fourth quarter of 2026. The Token is expected to launch initially on Solana, with deployment on other blockchain networks contemplated thereafter, subject to legal, regulatory, audit, technical and market conditions. Primary-market subscriptions and redemptions are available only to Participating Dealers approved by the Issuer that satisfy the applicable professional-investor, non-U.S. person, onboarding and other eligibility requirements. Tokens may subsequently be made available for secondary trading on approved centralised exchanges, decentralised exchanges or other trading venues, including venues that may provide access to retail users. Any such trading remains subject to Applicable Laws, selling restrictions, investor eligibility requirements, the rules and controls of the relevant venue and applicable wallet or transfer restrictions. Availability of a Token on a trading venue does not constitute an offer or solicitation by the Issuer to any person who is not eligible to acquire or hold it.

Part A: Information about the Issuer

Ref.	Field	Content
A.1	**Statutory name**	Cocoa Issuer Limited
A.2	**Legal form**	A British Virgin Islands orphan special purpose vehicle established for the purpose of issuing the Notes. The Issuer is not affiliated with, sponsored by or endorsed by CSOP Asset Management Limited, the manager of 7709, or any other person involved in the management or operation of 7709.
A.3	**Registered address**	OMC Chambers, Wickhams Cay 1, Road Town, Tortola, British Virgin Islands
A.4	**Date of registration**	21st July, 2026
A.5	**Company registration number**	BVI Company Number: 2214385
A.6	**Ownership of the Issuer**	The issued share capital of the Issuer is held by Cocoa Foundation, a foundation company incorporated in the Cayman Islands.
A.7	**Business activity**	The Issuer was established for the purpose of issuing the Notes. The proceeds of an issuance may be used to acquire and maintain exposure

		to 7709 and to pay related transaction costs and expenses.
A.8	**Conflicts of interest disclosure**	The Issuer is an orphan vehicle unaffiliated with CSOP. The roles of the manager, trustee, custodian and registrar relate solely to 7709 and do not create any contractual or other direct relationship between CSOP and the Issuer or any Holder. WAGMIx is involved in arranging the issuance and providing tokenisation and operational services, and may receive fees in connection with those roles. WAGMIx's multiple roles may give rise to potential conflicts in relation to token operations, including but not limited to creation, redemption, transfers, suspensions and valuation determinations.
A.9	**Connection between the Issuer and the DLT operator**	WAGMIx Company Limited, a company incorporated in Hong Kong, acts as Tokenisation Agent, Calculation Agent and Token Registrar. It coordinates the deployment and operation of the relevant smart contracts and maintains the Token register in accordance with the definitive transaction documents, with technology support provided by Finloop Finance Limited. Finloop Finance Limited acts as Blockchain Paying Agent. The on-chain ledger and the records maintained by the Token Registrar evidence holdings in the manner specified in the definitive transaction documents, which also determine the record that prevails in the event of any discrepancy.
A.10	**Newly established**	Yes. The Issuer is a special purpose vehicle established for the purpose of issuing the Notes and carrying out related activities.
A.11	**Financial condition**	The Issuer is a newly established special purpose vehicle and has not yet generated material operating revenue or established a material financial or operating history. Prospective investors will therefore have limited historical financial information on which to assess the Issuer's ability to perform its obligations under the Notes.
A.12	**Related parties in respect of the underlying**	CSOP Asset Management Limited acts as manager, and HSBC Institutional Trust Services (Asia) Limited as trustee, custodian and registrar, solely in their existing capacities in respect of 7709 as a listed exchange-traded product. Fosun International Securities Limited acts as custodian of the underlying assets held by the Issuer. The Issuer is an orphan special purpose vehicle and is not affiliated with, sponsored by or endorsed by any of the parties listed above. None of those parties guarantees or otherwise provides credit support in respect of the Notes.

Part B: Information about the Token

Ref.	Field	Content
B.1	**Name**	WAGMIx SK Hynix Daily Max (2x)
B.2	**Abbreviation or ticker**	SKHY2Lw
B.3	**Persons involved in design and development**	The Issuer, a British Virgin Islands special purpose vehicle, and WAGMIx Company Limited, acting as Tokenisation Agent with technology support provided by Finloop Finance Limited.
B.4	**Type of white paper**	Product white paper for the WAGMIx SKHY2Lw Token, which represents

		a digitally native tokenised Note issued by the Issuer.
B.5	**Characteristics of the token**	Each Token represents one digitally native Note issued by the Issuer and provides contractual economic exposure to 7709 in accordance with the definitive transaction documents. The Token is not a unit of 7709 and does not confer any ownership or beneficial interest in 7709 or the fund of which it forms part. Tokens may be held and transferred on supported blockchain networks and may be traded through applicable order-book, automated market-maker or request-for-quote arrangements, subject to Applicable Laws, selling restrictions, venue rules and transfer controls.
B.6	**Website of the Issuer**	https://wagmix.com/ (the Issuer currently operates as a separate entity from WAGMIx under the WAGMIx brand; a separate website may be introduced in the future)
B.7	**Starting date of the offer or admission to trading**	20 November 2026
B.8	**Publication date**	4 November 2026
B.9	**Languages**	English only
B.10	**Underlying reference asset**	The Underlying Reference Asset is the CSOP SK Hynix Daily Max (2x) Leveraged Product (HKEX stock code: 7709), a Hong Kong-listed daily leveraged product. It seeks to provide investment results that, before fees and expenses, correspond to up to two times the daily performance of the common stock of SK hynix Inc. (KRX stock code: 000660), subject to its applicable investment strategy and product terms. Units of 7709 may be held by the Issuer for hedging, liquidity-management and operational purposes, but 7709 itself is not tokenised. The investment theme represented by 7709 has attracted significant market attention, reflecting growing investor interest in artificial-intelligence infrastructure and high-bandwidth memory. SK hynix is a leading global supplier of high-bandwidth memory used in AI accelerators and is widely recognised as a significant beneficiary of increasing demand for AI-related computing infrastructure. Based on publicly available market data for the period from 11 June to 10 July 2026, 7709 recorded total turnover of approximately HKD303.83 billion and average daily turnover of approximately HKD15.19 billion, and accounted for approximately 5% to 8% of total securities-market turnover on the Hong Kong Stock Exchange during that period. Its assets under management reached approximately HKD132.99 billion at their peak during the relevant period. These figures are historical, may not be representative of current or future market conditions and should not be regarded as an indication of future performance, liquidity or investor demand.
B.11	**Operational reserve arrangements**	For hedging, liquidity management and operational purposes, the Issuer intends to maintain assets which may comprise units of 7709, cash or cash equivalents, including during periods in which the acquisition or

		settlement of 7709 units is pending. The Issuer may perform reserve-to-supply reconciliation and may publish periodic or event-driven information concerning those assets. These arrangements do not constitute collateralisation of the Notes. The relevant assets remain assets of the Issuer, are not held on trust or otherwise segregated for the benefit of Holders and are not subject to any security interest in favour of Holders. Holders have only the contractual rights against the Issuer specified in the definitive transaction documents.

Part C: Information about the Offer to the Public and Admission to Trading

Ref.	Field	Content
C.1	**Type of offer**	Primary-market subscriptions are available only to Participating Dealers approved by the Issuer that are professional investors, are not U.S. persons and satisfy all applicable legal, regulatory, onboarding, KYC/AML/KYT, sanctions and venue requirements. The Notes will not be offered or promoted by the Issuer in any jurisdiction or to any person where such offer or promotion would be unlawful.
C.2	**Number of units**	No fixed or pre-set maximum supply applies. The primary market operates on a creation-and-redemption model available only to Participating Dealers approved by the Issuer. A Participating Dealer may subscribe in cash, supported stablecoins or, where accepted by the Issuer, by delivery of Eligible Assets, in each case in accordance with the definitive transaction documents. Tokens are minted following receipt of the applicable subscription consideration in full and satisfaction of the applicable issuance and settlement conditions, and are burned or cancelled following redemption. Accordingly, the outstanding number of Notes may increase or decrease in response to primary-market creation and redemption activity. The Notes are denominated in USDT or USDC. The Issue Price and Specified Denomination of each Note are determined by reference to the value of 7709 in accordance with the definitive transaction documents. The Notes are perpetual. Token delivery and settlement will take place following receipt of cleared funds or Eligible Assets, as applicable, and satisfaction of the applicable issuance and settlement conditions. The minimum primary-market creation or redemption size is 100,000 Notes, or such other minimum or multiple as may be specified or agreed in accordance with the definitive transaction documents.
C.3	**Trading platforms**	Secondary trading may be made available through approved centralised exchanges, decentralised exchanges, wallet integrations or other

		trading venues, including venues that may provide access to retail users. All secondary trading remains subject to Applicable Laws, selling restrictions, investor eligibility requirements, the rules and controls of the relevant venue and applicable wallet or transfer restrictions. Designated market makers may support secondary-market liquidity, but neither the Issuer nor any other person guarantees that an active or liquid secondary market will develop or continue.
C.4	**Valuation, pricing and market making**	The indicative value of the Notes is determined by reference to the value of 7709 and the valuation provisions set out in the definitive transaction documents. Executable secondary-market prices are determined through the applicable order book, request-for-quote process, automated market maker or market-maker quotations and may differ from the indicative value of the Notes. The Calculation Agent may take into account the latest published NAV of 7709, available market prices, applicable foreign-exchange rates, fees and costs and such other market information as it considers relevant, acting in good faith and in a commercially reasonable manner. Any value displayed outside the trading hours of 7709, or while a relevant market or valuation source is unavailable, is indicative only and may differ materially from the value subsequently determined under the definitive transaction documents. The Notes do not have a guaranteed fixed peg, and quotations, order sizes or trading may be limited, suspended or unavailable. Following a Potential Adjustment Event, the Calculation Agent may make such adjustments as are permitted under the definitive transaction documents.
C.5	**Target market and distribution approach**	The product is intended to provide on-chain access to economic exposure to 7709. Distribution may involve approved centralised exchanges, decentralised exchanges, wallet integrations and other trading venues following completion of the applicable legal, compliance, audit and technical requirements. Marketing activities are intended to be education-led and compliance-gated. Availability through a secondary trading venue, including a venue that may provide access to retail users, does not constitute an offer or solicitation by the Issuer to any person who is not legally eligible to acquire or hold the Token.

Part D: Rights and Obligations Attached to the Token

Ref.	Field	Content
D.1	**Holder rights and obligations**	Holders have the contractual economic and transfer rights specified in the definitive transaction documents. The Notes provide economic exposure to 7709 but do not confer any ownership, voting, governance,

		pre-emption, management, distribution or other rights in respect of 7709, SK hynix, CSOP Asset Management Limited or the fund of which 7709 forms part. Any adjustment resulting from a consolidation, split, suspension, delisting, termination or other event affecting 7709 will be made only in accordance with the definitive transaction documents.
D.2	**Conditions for modification of rights and obligations**	The Issuer may make any formal, minor or technical amendment, correct a manifest error or make any other amendment permitted without Holder consent under the definitive transaction documents. Any other modification which is materially prejudicial to the interests of Holders shall require approval in accordance with the applicable Holder voting and consent procedures set out in the definitive transaction documents.
D.3	**Redemption**	Creation and redemption are available only through Participating Dealers approved by the Issuer and in accordance with the procedures set out in the definitive transaction documents. A secondary-market Holder wishing to exercise an applicable Put Option must do so through an approved Participating Dealer and must satisfy the applicable KYC/AML/KYT, sanctions, onboarding, notice and settlement requirements. The Issuer may exercise its Call Option in accordance with the definitive transaction documents. Creation or redemption may be suspended or delayed where reliable valuation, acquisition or disposal of 7709 units, settlement, custody or reconciliation is unavailable.
D.4	**Complaints**	Complaints may be submitted to the Issuer free of charge using the contact details provided on its website. The Issuer will acknowledge and consider complaints using reasonable endeavours and in accordance with its applicable complaints-handling procedures.
D.5	**Dispute resolution**	Any dispute, controversy or claim arising out of or in connection with the Notes, including any question regarding their existence, validity or termination, shall be referred to and finally resolved by arbitration administered by the Hong Kong International Arbitration Centre in accordance with the HKIAC Administered Arbitration Rules in force when the notice of arbitration is submitted. The seat of arbitration shall be Hong Kong, and the arbitration proceedings shall be conducted in English.
D.6	**Value protection and compensation schemes**	The Notes are not covered by any investor-compensation or deposit-guarantee scheme and do not provide a fixed return or capital protection. The Notes are direct, unsecured and unsubordinated obligations of the Issuer. Holders have no security interest in, or proprietary or beneficial right to, any units of 7709 or other assets held by the Issuer. The Notes may be redeemed pursuant to a Put Option, Call Option or any mandatory or early-redemption event specified in the definitive transaction documents. The applicable redemption amount may be reduced by applicable fees, costs, taxes and deductions, and a Holder

		may lose some or all of its investment.
D.7	**Applicable law**	The Notes and any non-contractual obligations arising out of or in connection with them are governed by English law.

Part E: Information on the Underlying Technology

Ref.	Field	Content
E.1	**Distributed ledger technology**	The Token is expected to launch initially on Solana, with deployment on other blockchain networks contemplated thereafter, subject to audit, compliance and market conditions. The planned smart-contract frameworks include Solana-ACL on Solana and ERC20W-Factory on Ethereum and other EVM-compatible networks.
E.2	**Consensus mechanism**	The Token relies on the consensus mechanism of each blockchain network on which it is deployed. The supported networks generally use Proof-of-Stake ("PoS") or variants thereof. For example, Solana uses PoS, BNB Chain uses Proof of Staked Authority ("PoSA"), and Robinhood Chain ultimately relies on Ethereum's PoS consensus.
E.3	**Incentive mechanisms and fees**	Network transaction fees are payable on the underlying blockchain. In addition, the following fees are charged to Participating Dealers, subject to change from time to time at the Issuer's total discretion: (a) Subscription Fee: 10 bps of the total subscription value, charged on each subscription; (b) Redemption Fee: 10 bps of the total redemption value, charged on each redemption; and (c) Underlying-Asset Custody Fee: 25 bps per annum, calculated by reference to the value of units of 7709 held in the account used for the Issuer's operational reserve arrangements in connection with the relevant Tokens. A reduced custody fee may be approved on a case-by-case basis.
E.4	**Use of the distributed ledger and functionality**	On-chain controls include governed mint and burn permissions, blacklist administration, wallet and transaction monitoring, reserve-to-supply reconciliation, incident escalation and controlled upgrades. Secondary transfers use a blacklist model: transfers remain subject to applicable selling restrictions, investor eligibility requirements, wallet restrictions and technological or platform limitations, as well as the blacklist mechanism. WAGMIx coordinates smart-contract deployment and day-to-day token operations. Finloop Finance Limited is responsible for KYC/AML/KYT for a Market Maker acting as a Corporate Professional Investor only, prior to any sale and settlement of the Notes.
E.5	**Audit**	The smart-contract framework used for deployment on Solana has undergone the applicable official audit process. The ERC20W-Factory smart contract used for deployment on Ethereum and other EVM-compatible blockchain networks has been audited by Beosin. The relevant audit reports will be published on WAGMIx's official website.

Part F: Information on the Risks

Ref.	Field	Content
F.1	**Issuer-related risks**	The Notes are direct, unsecured and unsubordinated obligations of the Issuer. Holders are exposed to the credit and insolvency risk of the Issuer and have no security interest in, or proprietary or beneficial right to, any units of 7709 or other assets held by the Issuer. Operational reserve arrangements do not remove or reduce that credit risk. The Issuer is a newly established special purpose vehicle with no material operating or financial history and depends on its service providers for tokenisation, valuation, custody, payment, settlement and operational functions. A failure, default or disruption affecting any such service provider may adversely affect the Notes.
F.2	**Token-related risks**	The Notes are not principal protected and provide economic exposure to 7709, a daily leveraged product referencing SK hynix. Their value may be affected by leverage, daily rebalancing, path dependency, compounding and volatility decay, tracking difference, market volatility, liquidity, concentration, valuation disruption, foreign-exchange movements and the performance of SK hynix. A Holder may lose some or all of its investment. Secondary-market prices may trade at a premium or discount to the indicative value of the Notes. There is no assurance that an active or liquid market will develop or continue. Creation and redemption may be rejected, suspended or delayed where reliable valuation, liquidity, settlement, custody or reconciliation is unavailable or where required by Applicable Laws or the definitive transaction documents.
F.3	**Technology-related risks**	The Notes are subject to smart-contract, private-key, wallet, blockchain, cybersecurity, exchange, custody, settlement, reconciliation and other operational risks. A technical failure, security incident, network congestion, chain disruption, erroneous transaction or failure of a service provider may delay or prevent transfers, trading, valuation, creation or redemption.
F.4	**Mitigation measures**	Risk-management measures may include operational reserve arrangements, reserve-to-supply reconciliation, valuation and capacity monitoring, governed mint and burn permissions, blacklist administration, wallet and transaction monitoring, controlled upgrades, market-maker inventory and order-size controls and the suspension of quotations, trading, creation or redemption where reliable pricing, liquidity, settlement or reconciliation is unavailable. These measures are operational controls only, do not constitute collateral or security for the Notes and do not eliminate any investment, credit, liquidity, technology or operational risk.

Part G: Additional Information

Ref.	Field	Content
G.1	**Roadmap**	The following roadmap is indicative only, does not constitute a commitment by the Issuer or any other person and remains subject to legal, regulatory, compliance, audit, technical, commercial and market conditions. Q4 2026 (launch): complete the legal, audit and reserve-reporting pack; launch on Solana, with deployment on other chains planned thereafter; list on approved CEXs and leading DEXs with initial 7x24 market-maker support; Q4 2026 – Q1 2027: deepen CEX or DEX liquidity and wallet integrations; expand market-maker coverage; Q1 2027 – Q2 2027: seek integration with third-party platforms that may permit eligible users to use the Token as collateral, subject to the rules and discretion of those platforms; Q2 2027 and onwards: continue multi-chain expansion.

Disclaimer

This white paper is a descriptive summary provided for information purposes only. It does not form part of, and is qualified in its entirety by, the definitive transaction documents, which prevail in the event of any inconsistency. This white paper does not create or vary any legal right or obligation. The rights and obligations of the Issuer, Holders and other transaction parties are governed exclusively by the definitive transaction documents. Availability of the Tokens on a secondary trading venue does not constitute an offer or solicitation by the Issuer and does not disapply any selling restriction, investor eligibility requirement, venue rule or legal restriction. Nothing in this document constitutes an offer, a solicitation, or investment, legal, tax or financial advice. The tax treatment of acquiring, holding, transferring, redeeming or disposing of the Notes will depend on the circumstances and jurisdiction of the relevant Holder, and each prospective investor should obtain independent tax advice. Forward-looking statements, including launch timing, roadmap items, target audiences and projected traction, are indicative only, are subject to audit, compliance, regulatory clearance and market conditions, and may change. The Token confers no fixed return and no capital protection and may result in substantial or total loss.
